Seasoned Peruvian software engineer with 8 years in the industry developing applications for **Android** and **iOS** platforms and also **Back Ends**, ranging from enterprise to social Apps. I began working on a full time job as a professional at aged 19 and have since then developed large scale enterprise backend for telecom, apps for retail, banks and multinational companies. Currently, at age 27 I'm looking for a small or medium sized company where I can demonstrate and improve my skills on Android, iOS or both.

SKILLS

I invite you to look my [Linkedin](#) and [Github](#) profile.

Android Platform: Clean Architecture, MVVM, MVP, Kotlin, Java, C, C++, JNI, Androidx, Lifecycle, Room, GreenDAO, Koin, Dagger2, Coroutines, RxJava, EventBus, Firebase, Google Maps v2, Google Location, Fabric, Material design and UI libraries, Socket.io, okhttp, Retrofit, Gson, Moshi, Fresco, Picasso, Glide, Timber, JUnit 4, Mockito, Roboelectric, Espresso.

iOS Platform: MVC, MVVM, Swift 5, SwiftUI, Combine Framework, Swift 4, RxSwift, Socket.io, Alamofire, Codable, UIKit, CoreData, SQLite.swift, Dispatch, Swift Package Manager, Carthage, Cocopods, Firebase, MessageKit, Kingfisher.

Backend: Swift 4, Vapor 3, Java, Spring, Hibernate, EJB, Tomcat, Glassfish, Wildfly, Weblogic, MySQL, MS SQL, Oracle and etc.

Linux Platform: Swift 4 and 5, Swift package Manager, Gnome GTK+ 3.

Other Platforms: Arm 64, Raspberry Pi and Odroid.

QUALIFICATIONS

2017 | **Associate Android Developer**
Google Developers [see credential](#)

2016 | **General English**
University of Sydney – CET [see evidence](#)

2015 | **Oracle Certified Professional, Java SE 6 Programmer**
Oracle [see credential](#)

2008 – 2013 | **Bachelor of Systems and informatics Engineering**
Norbert Wiener University [see evidence](#)

WORK EXPERIENCE

July 2019 - Present | **Mobile Developer | Chasky** | Peru, Lima | Remote Job
Working on a social network Android and iOS App.

March 2018 - Jun 2019 | **Swift Developer | Racepoint Energy** | USA, Mass | Remote Job
Developed open source swift libraries for making android apps using Swift. It helped to reuse functional Swift libraries on Android. Also, worked on a Linux Swift App which run on ARM.

March 2017 - February 2018 | **Senior Android Software Engineer** | **Solera Mobile** | Peru
Developed new Apps for company customers, maintaining and Refactoring the old ones. I also lead the standardisation of an architecture for making new Apps and I implemented tools for a better communication and working between the teams.

April 2015 - July 2016 | **Android Software Engineer** | **SYSCO AS** | Norway | Remote Job
Maintained 7 existing android apps where I implemented modularization because those apps had many similar functions.

February 2014 - October 2014 | **Analyst & Programmer SOA** | **COSAPI DATA** | Peru
Worked on the team which implemented Local Number Portability for one of the biggest telecom companies in Peru. I read/analysed the documents of the peruvian Government entity and created a process diagram. Then, we started to create the SOAP web services.

June 2013 - February 2014 | **Leader Web & Mobile Developer** | **Tecla Labs** | Peru
Develop REST Apis for the Mobile Apps and help on the mobile development.

If you are interested in seeing more of my experience, let me invite you to see my [linkedin](#), you also will be able to see my skill marks and recommendations.
